

This is to certify that comprehensive tests were carried out by the RMIT I.T. Test Laboratory in order to compare the quality of Resolution brand inkjet cartridges and papers, with the original (OEM) brands.

In particular, tests were carried out in the areas of:

1. Colour Fidelity
2. Image Resolution
3. Cartridge Life
4. Drying times on photo gloss media

IN GENERAL, THERE WAS NO SIGNIFICANT DIFFERENCE FOUND BETWEEN THE RESOLUTION BRAND AND THE OEM BRANDS, FOR ALL OF THE 4 AREAS TESTED ABOVE.

Resolution Premium Photo Gloss paper was found to be superior to the OEM brands of entry-level Photo Gloss paper, and on par, and at some times surpassing the OEM brands' range of Premium Photo Gloss papers.

Resolution Ink Cartridges & Papers provide a good value for money alternative when compared to the 'original' brand products tested

Steven Turvey
RMIT IT Test Lab Manager

- The Epson printer tested was the Stylus Photo 1290 & its associated OEM cartridges & gloss papers
- The Canon printer tested was the Canon i850 & its associated OEM cartridges & gloss papers
- Based on OEM and Resolution pricing at the time of testing: March 2004
